Custom Development & Integrations – Solutions Architect

The role you play

An effective Custom Development & Integration Solutions Architect will help the organization on a whole achieve success through:

- Embracing our mission to humanize healthcare
- Living our Tegria values–being real, serving intentionally, and stepping in and stepping up
- Translating business requirements into application storyboards and use cases
- Working with customers in assessments to understand business needs and translating into a solution opportunity
- Explaining technical concepts to non-technical audiences at both internal teammates and clients
- Ensuring the best possible performance, quality, and responsiveness of applications
- Providing recommendations and best practices with deep knowledge understanding of specific solutions available in the industry
- Participating in development activities as needed to support the development team
- Maintaining code quality, organization, and automatization
- Participating as a team member in meetings and collaboration with team
- Communicating regularly with others involved in the development process
- Providing support for our healthcare clients
- Meeting project deadlines in a remote setting
- Partnering with our internal Tegria teams to help promote consulting work and team-specific services
- Mentoring other consultants and development team members both internal and at clients on project activities and deliverables
- Learning additional technologies as required and appropriate

What we're looking for

We expect:

- Proven experience with software architecture and the ability to design applications
- Willingness to present solutions and proposals to various groups when needed
- Natural ability to lead diverse groups of people across multiple facets of the healthcare
- Demonstrated strategic planning experience
- Understanding of core technical tools and frameworks across multiple platforms and architectures

- Deep understanding of the development lifecycle with proven design and development experience, particularly using the full Microsoft stack (e.g. .NET, C#, ASP.NET, Core)
- Experience in developing REST API's, preferability on .NET MVC WEB.API
- Experience with integration of systems using standard technologies
- Experience managing project scope and timelines
- Familiarity with SQL database design and analysis
- Understanding of Cyber Security concepts and coding best practices
- Demonstrated understanding of a systems approach to technical solutions and use of systems engineering processes

We'd love to see:

- Bachelor's Degree in Computer Science, Engineering, or related field – or comparable development experience
- Certifications in relevant technologies
- Experience with mobile development
- Experience with cloud tools and platforms
- Experience with JavaScript frameworks (e.g. VueJS, ReactJS and/or similar libraries)
- Experience with HTML and web development frameworks (Bootstrap, jQuery)
- Experience developing with Entity Framework or other Code First frameworks
- Process improvement mindset
- Healthcare knowledge preferred
- Knowledge of Epic software capabilities and functions
- Experience with Azure DevOps or other project management tools
- Proficiency with code versioning tools
- Experience with authentication and authorization concepts (e.g. Owin, JWT, IAM)
- Enjoy solving new and challenging problems
- Creative mindset with an eye for design

Now, a little about us …

At Tegria, we bring bold ideas and breakthroughs to improve care, technology, revenue, and operations in ways that move healthcare organizations from patient-centered to human-centered. We are helping healthcare put people first—both patients and those who dedicate their lives to delivering care.

And at the very core of this vital work is our incredibly talented people.

People with different backgrounds who welcome challenge and change. People who listen first, ask hard questions, and make decisions to cultivate a culture of equity and inclusion. People who chase after goals, growth, and generosity. We're real. We're nimble, and we believe in our mission to humanize healthcare.

Perks and benefits

Top talent deserves top rewards. We've carefully curated a best-in-class benefits package, meant to meet you wherever you are in your life and career.

- **Your health, holistically.** We offer a choice of multiple health and dental plans with nationally recognized networks, as well as vision benefits, a total wellness program, and an employee assistance program for you and your family.
- **Your financial well-being.** We offer competitive wages, retirement savings plans, company-paid disability and life insurance, pre-tax savings opportunities (HSA and/or FSA), and more.
- **And everything in between.** Our lifestyle benefits are unrivaled, including professional development offerings, opportunities for remote work, and our favorite: a generous paid-time-off program, giving you the flexibility to plan a vacation, take time away for illness (or life's important events), and shift your schedule to accommodate those unexpected curve balls thrown your way.
