

Quality Assurance Engineer

The role you play

Custom Development & Integrations Consultant – QA Engineer, responsibilities and Assignments:

Client Responsibilities:

- Embracing our mission to humanize healthcare
- Living our Tegria values—being real, serving intentionally, and stepping in and stepping up
- Collaborating on project activities and deliverables with fellow Bluetree team members. Participating as a member of a project team, working closely with Bluetree professionals and senior leaders to meet our customer’s needs. Could be full-time on a single customer engagement or part-time across customers.
- Owning meeting scheduling and coordination, preparation, documentation, and follow-up
- Utilize existing project tools, templates and project plans, as applicable, per assignment.
- Documenting current-state processes through discovery and analysis
- Participating in future-state workflow, policy, and process design and planning
- Building, testing, training, converting and/or deploying new infrastructure, workflows, policies, and processes
- Participating in major milestone reviews and decision gates
- Presenting to a wide variety of audiences
- Identifying measurable outcomes resulting from initiatives through KPI analysis and impact tracking
- Effectively utilizing communication, decision-making, and escalation pathways
- Participating in project wrap-up through outcomes documentation, lessons-learned, and leave-behind materials allowing customers to sustain ongoing operations

What we're looking for

We expect:

- Participate in all phases of the development lifecycle
 - Meet with the software/product designers to determine quality assurance parameters
 - Design QA test plans, procedures, and reports to support best practices for SDLC to improve development process, efficiency, and performance and to ensure all products meet the highest quality possible
 - Create, execute, and maintain automated unit tests, integration tests, and end-to-end tests to verify functionality, automate regressions, compatibility, and performance testing to run
- 
- A decorative blue pattern consisting of diagonal lines is located in the bottom right corner of the page.

against web and windows applications

- Analyze bugs and errors found during tests
- Document results of tests for the development operations team. Communicate test progress, test results, and other relevant information to project stakeholders and management.
- Help evolve and implement and maintain and automation framework development
- Assist in the development of change control processes, practices, and guidelines for new and existing technologies
- Recommend improvements in software to enhance user experience
- Work together with the developer to enhance and improve programs
- Maintain updated knowledge of QA best practices trends and advancement

We'd love to see:

- 3+ years of experience in web-application testing.
- Experience working in project management and QA methodology
- Ability to document and troubleshoot errors
- Familiarity with Agile framework and regression testing
- Working knowledge of test management software and SQL
- Attention to detail
- Proven data analysis, data verification, and problem-solving abilities.
- Strong organizational skills
- Experience testing security, authorization, access

Now, a little about us ...

At Tegria, we bring bold ideas and breakthroughs to improve care, technology, revenue, and operations in ways that move healthcare organizations from patient-centered to human-centered. We are helping healthcare put people first—both patients and those who dedicate their lives to delivering care.

And at the very core of this vital work is our incredibly talented people.

People with different backgrounds who welcome challenge and change. People who listen first, ask hard questions, and make decisions to cultivate a culture of equity and inclusion. People who chase after goals, growth, and generosity. We're real. We're nimble, and we believe in our

mission to humanize healthcare.

Perks and benefits

Top talent deserves top rewards. We've carefully curated a best-in-class benefits package, meant to meet you wherever you are in your life and career.

- **Your health, holistically.**We offer a choice of multiple health and dental plans with nationally recognized networks, as well as vision benefits, a total wellness program, and an employee assistance program for you and your family.
- **Your financial well-being.**We offer competitive wages, retirement savings plans, company-paid disability and life insurance, pre-tax savings opportunities (HSA and/or FSA), and more.
- **And everything in between.**Our lifestyle benefits are unrivaled, including professional development offerings, opportunities for remote work, and our favorite: a generous paid-time-off program, giving you the flexibility to plan a vacation, take time away for illness (or life's important events), and shift your schedule to accommodate those unexpected curve balls thrown your way.

Tegria is an equal employment opportunity employer and provides equal employment opportunities (EEO) to all persons regardless of age, color, national origin, citizenship status, physical or mental disability, race, religion, creed, gender, sex, sexual orientation, gender identity and/or expression, genetic information, marital status, status with regard to public assistance, veteran status, or any other characteristic protected by federal, state or local law. All qualified candidates are encouraged to apply.
