

Cloud Hosting and On-Premises Support Services

Improve Efficiency and Accelerate Performance

Let's create a more flexible, efficient hosting solution.

Healthcare is evolving and healthcare data ever-expanding. Your hosting platform should evolve too. Whether you need to migrate data to the cloud while supporting a legacy system or you're ready for a new public, private, or hybrid hosting solution, we can help. Our cloud services combine best-of-breed technology, decades of cloud hosting experience and best practices, and delivery expertise across a variety of target platforms to support your EHR and third-party systems.

We offer:

- EHR and third-party expertise
- 25+ years hosting experience
- Tegria Cloud
- Microsoft Azure Public Cloud
- Amazon AWS Public Cloud
- Flexibility to meet your scale and needs
- Operational and financial planning
- Advisory services to help you find the right solution

Tegria's Hosting and Infrastructure Services

Public, Private, and Hybrid Hosting

Enterprise Operations & Integrations
in the cloud or on-premises

Disaster Recovery and Cloud Backup
to protect and secure your data

On-Premises Infrastructure Support

Hosting and System Administration Services

Public Cloud Hosting

Scalable and Affordable

With decades of cloud hosting experience, we can help you select the right cloud platform and manage infrastructure with the required technical expertise.

Private Cloud Hosting

High-Performance and Highly Flexible

For high-volume implementations that need more flexibility, the Tegria Cloud offers a high-performance solution customized to meet your organization's unique needs. The Tegria Cloud provides greater flexibility with the scalability of public cloud hosting and a predictable operational cost model.

Hybrid Hosting

Customized Solutions

Mix and match between public and private cloud as well as on-premises hosting based on the needs of your applications and workloads. For example, your organization might host test/dev in the public cloud, production on-premises, and disaster recovery in a private cloud.

On-Premises Enterprise Operations and System Administration

Skilled Support When You Need It

Hosting your data on-site or planning to transition to the cloud while phasing out a legacy system? We provide remote technical expertise to administer systems that you host within your data centers, across EHRs and third-party applications.

We support:

- All versions of MEDITECH and Epic
- All MEDITECH and Epic approved hardware vendors
- Epic ODB, ECSA, and Cogito administration
- Interface Engine as a Service
- Legacy system support
- Data migration between hardware platforms, data centers, and cloud platforms
- Systems surveillance and monitoring

Ready to elevate efficiency and accelerate performance with scalable, affordable cloud hosting and system administration? Let's talk.
