

Epic Tapestry Services and Support

Streamline Health Plan Operations

Let's maximize your investment and prepare for the future.

As part of the Epic system of applications, Tapestry offers health plans a more integrated, efficient way to manage their operations. Tapestry consolidates multiple modules into a one system to give payers a single source for comprehensive information about a covered member.

Unlocking Tapestry's full potential helps health plans prepare for current and future business needs to better serve members, providers, and communities. Our consultants bring focused Tapestry expertise and deep knowledge across all Epic modules and other third-party health plan software. Our experience in health plan operations and provider workflows helps organizations achieve smooth, sustainable functionality and significant cost savings.

Assessment

Using Tapestry can help your organization achieve more integrated operations by allowing providers to access clinical data and maintaining a single patient/member record between payers and providers. But this integration can present challenges around sharing an instance of Epic with a healthcare organization and concerns about future growth in new markets, membership expansion, and scalability. Whether payers currently use Tapestry or need to implement a new claims system, we can help organizations overcome these challenges and achieve their strategic goals.

Implementation

When your organization decides to implement Tapestry, we are ready to help users master this module's key features and benefits to ensure maximum usability and ROI. Our experienced consultants can help payers understand how to build and use Tapestry today while planning for growth, meeting evolving requirements and regulations, and adapting to a dynamic healthcare marketplace.

Optimization

For payers already using Tapestry, we can help accelerate performance by optimizing the existing system. Our experienced Tapestry team understands how health plans can make the most of their Epic modules, avoid common challenges, and achieve more integrated, efficient operations to save time and money. We can help payers realize the full value of Tapestry now and for years to come.

Whether you are just getting started or are ready to upgrade your current system, we can help. Let's redefine, build, and enhance your Epic Tapestry platform today.

Let's talk.
