

Moving Your EHR to Azure

Getting started on your cloud journey

Tegria Cloud Hosting

By combining our 25+ years experience hosting EHRs, our deep understanding of the entire Epic platform, and our expertise in Microsoft Azure, we enable our customers to focus on transformative healthcare by ensuring that their core systems are secure, reliable, and flexible.

“Other hospitals are asking us – How did you go from being on a brand-new EHR on February 1 to now being a pioneer in implementing a new remote patient monitoring solution?”

—Keith Willey, Val Verde Regional Medical Center CIO

What We Offer

The public cloud is constantly growing and adapting to meet the ever-evolving needs of healthcare, and Microsoft and Tegria are at the forefront of this growth. Tegria has helped over 50 Health Care Organizations design their cloud migration strategies and helped many of those execute on this strategy.

We use our knowledge and experience to determine the best timeline for migrating systems to Azure, whether it's focusing on specific Epic environments, related third party systems of a holistic approach for all existing infrastructure.

Our implementation and on-going support teams work closely together through the strategy, design, and execution phases, ensuring a continuity of knowledge throughout implementation and beyond. All our staff supporting Epic systems are properly certified for the systems they support.

Why Microsoft Azure? Be Future-Ready

Continuous innovation from Microsoft can support your development today, and your product visions for tomorrow. With more than 1,000 new capabilities in the just the past year alone, you can access and apply the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate Hybrid Seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90 percent of enterprises worldwide.

Build On Your Teams

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy however you choose. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs – trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust Your Cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
