Medically Unlikely Edits (MUE) Optimization

Accelerate reimbursement with automation

MUE denials force staff into time-consuming manual edits, delay reimbursement, and threaten millions in revenue. Without automation, organizations face rising denial volumes, unnecessary write-offs, and lost productivity across billing teams.

Tegria works with revenue cycle teams to automatically evaluate MUEs at billing to split or modify charges within payer thresholds. This automation reduces denials, decreases manual edits, and preserves revenue while ensuring compliance with CMS and payer rules.

> " **In my 25 years, I've never had a vendor come in to help my team that has every other team clamoring to work with them**.
>
> **Kelly Black, VP Revenue Cycle, Novant Health**

WHY TEGRIA?

- Deep Epic revenue cycle expertise
- Proven payer strategy and denial management success
- Collaborative approach with measurable client outcomes

CASE STUDY

Novant Health partnered with Tegria to implement MUE billing automation, and achieved:

- 55% reduction in MUE claim edit workqueue volume
- 371+ annual hours saved through automation
- 82% decrease in CO 151 MUE denials
- $5.2M annual reduction in denied claims
- Faster, cleaner claims submission

NOVANT® HEALTH

Eliminate costly denials, boost efficiency, and maximize reimbursement with Tegria's MUE optimization.
